

# End-to-end experts in global radioactive material transportation

At TAM International, we are not just freight forwarders – we are your end-to-end solution for transporting radioactive materials.

Our technical, engineering, operations, regulatory, and logistics experts can handle any high consequence transportation job, shipping by land, sea and air to get your product where it needs to go.

## Core Services

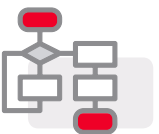

**Nuclear Front-End Logistics** – As one of the world's largest nuclear front-end shipping specialists, we work with premier mines and conversion facilities to transport everything from UOCs and natural UF<sub>6</sub> to fuel pellets and fissile material.

**Nuclear Back-End Logistics** – Backed by a strong global network of shippers and suppliers, our specialists and engineers will manage, categorize, and package your shipments to meet regulatory requirements in any country.

**NORM and Rare Earth Logistics** – As pioneers in the nuclear transportation industry and experts in radioactive waste categorization and packaging, TAM can deliver safe, compliant, efficient, and cost-effective NORM and Rare Earth transportation solutions.

**Global Logistics Consulting** – We're radioactive materials transportation specialists.

THE TAM INTERNATIONAL DIFFERENCE:

# Here to there done *right*

## The right **people**

TAM subject matter experts understand and solve the unique challenges companies like yours face. Our specialists are recognized industry leaders.

## The right **experience**

Since 2004, we have worked with leading mines and conversion facilities worldwide, crossing borders with shipments by ocean, air and land.

## The right **technology**

Our proprietary project management platform gives you powerful tools to live-track shipments, streamline data entry and processing, and improve delivery efficiency.

## The right **relationships**

TAM's strategic partners with suppliers and regulatory and transportation experts throughout the world will help you get your materials anywhere you need them to go.

## The right **equipment**

Our specialized trailers and container equipment and state-of-the-art storage facilities are designed to meet the rigorous standards of any mode of transport.

## The right **way to do things**

As a ISO 9001:2015-certified business, quality control is at the heart of everything we do. Our subcontractors are subject to comprehensive audits to ensure they meet our most stringent quality standards.

## The right **size**

Whether you need support for a major international project or just need to ship a single domestic truckload, we'll put our small town Canadian roots and work ethic to work for you.
